Vendors, Visitors, Affiliates without ID Card Privileges and Contractors

(and others who spend significant amounts of time on campus, including private companies and those with facilities-use agreements): USM guidance only mandates testing for students and employees, but it requires "all visitors" to meet health-and-safety requirements related to face coverings, physical distancing, compliance with local guidance on events and gatherings, hand hygiene, and daily symptom monitoring as stipulated by individual institutions. These groups will be required to adhere to the University's current health-and-safety requirements, which may become more stringent and may include testing based on the amount of time these groups are on campus and the likelihood of close contact with UMD community members. Contractors and Vendors must abide by UMD Contractor Requirements for Conducting Business During COVID-19 (available at purchase.umd.edu).
